

**September is  
Alcohol and Substance Abuse  
Recovery Month**

According to SAMHSA, **23 million Americans are currently addicted to alcohol and/or other drugs and only 1 in 10 receive treatment.**

That is a treatment gap of more than 20 million Americans.

This nationally recognized month focuses on promoting new evidence-based treatment and recovery practices, the emergence of a strong and proud recovery community, and the dedication of service providers and community members across the nation who make recovery in all its forms possible.
